

NEW

The **next generation** of
framing nails from Paslode.

Now with even **better drive performance**
and **tighter holding power.**

RounDrive® 30° Paper Tape Brite Framing Nails

Introducing the latest, innovative generation of framing nails now featuring a unique shank design delivering:

Improved Drive Performance:

- Consistently sinks nails into the toughest lumber, so there's less hammering after the fact and increased productivity
- Independently proven to improve fastener penetration rates by up to 40%*

Tight Holding Power:

- New design bonds with wood fibers, increasing holding power**
- Fastening is more secure, giving confidence and peace of mind in the quality of the workmanship

Building Code Compliant:

- Product meets all building code requirements for smooth shank framing nails
- Approved per ICC ES-3072

Continues to offer the same great benefits:

- Rigid and compact strips are durable and easy to handle
- Reinforced nail heads for tighter spacing and better drive performance
- Same number of nails per strip – less reloading and increased productivity
